

folded crimping

	CR10	CR10/H50
① throat	22 mm	22 mm
② Stroke length, adjustable	17mm	17 mm
③ daylight	76 mm	126 mm
weight	3 kg	3.2 kg

Force at Bottom Dead Centre (BDC) at point of permissible lever-operating force max. 200 N
Press force at Bottom Dead Centre (BDC): 12 kN

INFO

Connective tissue

It can be irritated or inflamed. One reason could be a strained wrist. In the majority of cases, the only remedy is to rest it for a good period of time.

Forearm muscles

Muscles that are frequently overstrained risk being damaged
Possible consequences: weak, prickling, and aching hands.

A tendosynovitis is painful and needs a long time to heal.

It is caused by overstraining the wrists. Monotonous and overstraining movements can also cause an inflammation

Assemble component parts with constant precision and rapidity using minimal muscle force
