

GKS Wheels Selection

GKS Wheels Selection

Our high-quality GKS-PERFEKT wheels are the result of our own development, innovation and endurance tests. Some of the tests we run are rolling resistance under load, wear and impact resistance.

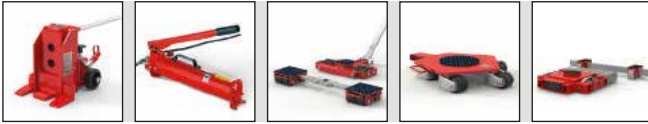

Our GKS-PERFEKT wheels are equipped with a special PA lining. We also offer wheels with PU lining or made of steel for special applications. The outstanding construction of our standard wheels, consisting of the core and a special lining ensures maximum stability, low weight, best running characteristics and a long service life. The advantage for you: GKS-PERFEKT wheels, designed for your special applications and outstanding floor protection (provided running surfaces are clean). Special wheels are available on request.

GKS ROBOT wheels

We use special wheels for our ROBOTS. These wheels were developed together with a major wheel manufacturer and are designed to withstand the special requirements.

Both our L-ROBOTS as well as the F-ROBOTS are equipped with these wheels.

GKS Wheels Selection

GKS-ALPERFEKT® PREMIUM

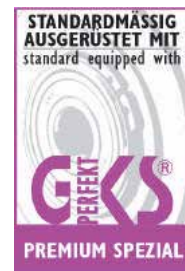

Our new standard wheel for trolleys with 110 mm loading height. Thousandfold approved, with a special aluminum alloy core and gripping toothing to increase its service life, 4 ball bearings and special polyamide lining for universal use.

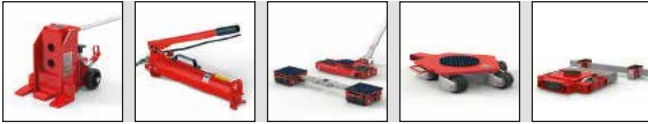

Technical Data GKS-ALPERFEKT® PREMIUM	Black	White
Item number	10015	10018
Size in mm	85 x 85	
Clean, even flooring	•	
Impure flooring	•	
Flooring with slight ridges	•	
Heavily contaminated floors		
Sensitive floors		
Total load capacity in kg	750	1200

GKS-ALPERFEKT® PREMIUM G

Our white standard wheel for trolleys with 180 mm loading height. Steel core and ball bearings as well as Polyamide lining for universal use.

Technical Data GKS-ALPERFEKT® PREMIUM G	White
Item number	10022
Size in mm	140 x 85
Clean, even flooring	•
Impure flooring	•
Flooring with ridges	•
Heavily contaminated floors	
Sensitive floors	
Total load capacity in kg	2500

GKS Wheels Selection

GKS-ALPERFEKT® PUR
 Our recommended special wheel with steel core and polyurethane lining for sensitive floors.

GKS-ALPERFEKT® STEEL
 Our recommended steel wheel for exterior surfaces (e.g. asphalt, etc.) and heavily contaminated floors indoors.
